Mr. Roger Luce
White Cap, LLC
1701 Williamsburg Pike
Richmond, IN 47375

Re: 177-15770
Second Administrative Amendment to
Part 70 177-7533-00001

Dear Mr. Luce:

White Cap, LLC, was issued a Part 70 permit on March 17, 1999 for a stationary fabricated metals products plant located at 1701 Williamsburg Pike, Richmond, Indiana. A letter requesting permit changes was received on June 19, 2002. The changes related to the transfer of insignificant emission units from the Evansville plant to the Richmond plant with emissions below significant thresholds. According to 326 IAC 2-7-11(a)(8), an administrative amendment may be used for a change that "revises descriptive information where the revision will not trigger a new applicable requirement or violate a permit term". The requested changes meet this condition, therefore, pursuant to the provisions of 2-7-11 the permit is hereby administratively amended as follows (~~strikeout~~ to show deletions and **bold** to show additions):

(1) Section A.3 is amended as follows:

A.3 ~~Specifically Regulated~~ Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)]
[326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities ~~which are specifically regulated~~, as defined in 326 IAC 2-7-1(21):

(1) (21)

(22) Isophorone bubbling

(23) PVC extrusion and molding

(24) The following tanks: #498 (MIBK), #499 (Xylene), #533 (Isophorone), #633 (Reclaim Solvent), #2675 (Varnish) and #D001 (Waste Solvent)

(25) Four (4) cap manufacturing curing ovens (Press Lines), each with a maximum heat capacity of 0.8 mmBtu/hr

(26) Four (4) secondary trimming lines (Scroll Lines).

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Madhurima Moulik, at (800) 451-6027, press 0 and ask for Madhurima Moulik or extension 3-0868, or dial (317) 233-0868.

Sincerely,

PART 70 OPERATING PERMIT OFFICE OF AIR QUALITY

**White Cap, LLC
1701 Williamsburg Pike
Richmond, Indiana 47375**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: T177-7533-00001	
Issued by: Janet G. McCabe, Assistant Commissioner Office of Air Management	Issuance Date: March 17, 1999

First Significant Permit Modification No. : 177-11458	Issuance Date: December 16, 1999
First Administrative Amendment No.: 177-14708	Issuance Date: August 21, 2001

Second Administrative Amendment No.: 177-15770	Pages Modified: 5, 6
Issued by: Original Signed by Paul Dubenetzky Paul Dubenetzky, Branch Chief Office of Air Quality	Issuance Date: July 2, 2002

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)]
[326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (1) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour.
- (2) Equipment powered by internal combustion engines of capacity equal to or less than 500,000 Btu/hr, except where total capacity of equipment operated by one stationary source exceeds 2,000,000 Btu/hr.
- (3) A gasoline fuel transfer and dispensing operation handling less than or equal to 1,300 gallons per day, such as filling of tanks, locomotives, automobiles, having a storage capacity less than or equal to 10,500 gallons.
- (4) Storage tanks with capacity less than or equal to 1,000 gallons and annual throughputs less than 12,000 gallons.
- (5) Vessels storing lubricating oils, hydraulic oils, machining oils and machining fluids.
- (6) Machining where an aqueous cutting coolant continuously floods the machining interface. (Machine Shop)
- (7) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6. (Cold Cleaners)
- (8) The following equipment related to manufacturing activities not resulting in the emission of HAPs; brazing equipment, cutting torches, soldering equipment or welding equipment.
- (9) Activities associated with the treatment of wastewater streams with an oil and grease content less than or equal to 1% by volume.
- (10) Quenching operations used heat treating processes. (Oil quench in Machine Shop)
- (11) Replacement or repair of electrostatic precipitators, bags in baghouses and filters in other air filtration equipment. (Roto-Clone and other systems throughout the plant.)
- (12) Process vessel degassing and cleaning to prepare for internal repairs.
- (13) Trimmers that do not produce fugitive emissions and that are equipped with a dust collection or trim material recovery device such as a bag filter or cyclone.
- (14) Paved and unpaved roads and parking lots with public access.
- (15) Asbestos abatement projects regulated by 326 IAC 14-10.
- (16) Equipment used to collect any material that might be released during a malfunction, process upset, or spill cleanup, including catch tanks, temporary liquid separators, tanks and fluid handling equipment.
- (17) Blowdown for any of the following: sight glass; boiler; compressors; pumps and cooling tower.
- (18) On-site fire and emergency response training approved by the department.
- (19) Diesel generators not exceeding 1600 horsepower. (One at 158 hp)

- (20) Grinding and machining operations controlled with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying and woodworking operations. (Machine Shop and Maintenance Shop)
- (21) A laboratory as defined in 326 IAC 2-7-1(21)(C).
- (22) Isophorone bubbling
- (23) PVC extrusion and molding
- (24) The following tanks: #498 (MIBK), #499 (Xylene), #533 (Isophorone), #633 (Reclaim Solvent), #2675 (Varnish) and #D001 (Waste Solvent).
- (25) Four (4) cap manufacturing curing ovens (Press Lines), each with a maximum heat capacity of 0.8 mmBtu/hr
- (26) Four (4) secondary trimming lines (Scroll Lines).

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22); and
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).
